

Little mousy feet and little mousy heads
Is how to decorate your home and make comfy owly beds.
But first you must age them and in a corner pile high
To dry out and to season and to build a good supply.
Now and then rearrange them and decide which one to eat
There are many snacks to chose from no need to eat the feet.
Within a few days you can hork them up and spread them all around.
A good carpeting is what you'll get to soften wooden ground.
Little mousy feet and little mousy heads
Is how to decorate your home and make comfy owly beds.
